

Wildfire Response Plan

The following areas are covered by this document:

- Contact names and telephone numbers
- Communications
- Rendezvous points
- Important hazards
- Access points
- Water supplies
- Equipment
- Neighbouring landowners
- Appendices 1, 2 and 3 - Wildfire Fire Plan Maps

1. INTRODUCTION

1.1 This Wildfire Response Plan contains specific risk and tactical information for NIFRS personnel responding to wildfire incidents at .

1.2 This is a farm of acres (approximately hectares). The Farm is engaged in farming and the land is composed of . Parts of the site are designated as .

1.3 can be found on the following Ordnance Survey coordinates:

•

1.6 Overview maps have also been included at the end of this document in Appendix 1.

1.7 **On arrival at an incident at , the first appliance in attendance should try to contact and meet with the land manager.**

2. CONTACT NAMES AND TELEPHONE NUMBERS

2.1 All key farm staff and contact numbers are presented below and over the page.

No.	Name	Position/Role	Contact Number
1			
2			

2.2 At the earliest opportunity, request for Fire Control to contact the following Agencies to inform them about the incident:

No.	Organisation
1	

WILDFIRE RESPONSE PLAN – XXXXXX Hill Farm

3. COMMUNICATIONS

3.1 According to , mobile phone reception is good for the following networks

-

4. RENDEZVOUS POINTS

4.1 Fire Control may supply details of the rendezvous point (RVP) with the turnout instructions. There is 1 predetermined RVP for the farm:

Code	Site Name	6 Figure Grid Reference	12 Figure Grid Reference	Notes

5. IMPORTANT HAZARDS

5.1 There a number of hazards on the farm.

Site Name/Description	6 Figure Grid Reference	Notes

6. ACCESS POINTS

6.1 There is 1 important access point to the farm.

No.	Grid Reference	Name of access route/description	Notes	Types of vehicles
A1				
A2				
A3				
A4				

6.2 For further advice regarding access points/routes and potential alternatives, liaise with onsite.

7. WATER SUPPLIES

7.1 There are a number of potential water supplies around/near the farm, including a number of streams/burns. The most reliable water sources are:

WILDFIRE RESPONSE PLAN – XXXXXX Hill Farm

Site Name	6 Figure Grid Reference	12 Figure Grid Reference	Notes

7.2 Some streams/burns may be seasonal. Consult with **Farmer/staff** onsite to find out which streams/burns may be suitable for pumping water at any given time.

7.3 **Farmer/staff** may be able to assist with moving/supplying large volumes of water. Consider requesting slurry tankers.

8. EQUIPMENT

8.1 has equipment that can be requested for use at a wildfire incident. Please note that equipment is used around the farm and may not always be found in the location stated below.

Equipment	Usual location	Contact(s)
